DETAILED OFFICE ACTION

1. Please Note: In an effort to enhance communication with our customers and reduce processing time, a dedicated Fax machine is in place to receive your responses. The Fax number is 703-305-3704. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Jyothsna Venkat, Ph.D., Supervisory Patent Examiner at jyothsna.venkat@uspto.gov or 703-308-2439. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

Restriction/Election

2. Claims 1-17 are pending in this application.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-11, 13-15 drawn to a method of preparing nucleic acid array on a support classified in class 536, subclass 25.3.
 - II. Claim 12, drawn to a method of preparing and packaging a nucleic acid array, classified in class 536, subclass 23.1.
 - III. Claims 16 and 17, drawn to a nucleic acid array, classified in class 435, subclass
- 6.

4. The inventions are distinct, each from the other because:

5. Groups I and II are related as different methods of making. They are different because the method of making in group I occurs in non-oxidizing atmosphere, whereas the method of making in group II involves exposure of nucleic acids to unfiltered air. Both processes are patentably distinct because the steps are different, the outcomes are different, and the outcomes are interpreted differently.

6. Groups II and III are related as methods of making and compositions. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make protein libraries. Ultimately, these differences suggest differences in subject matter categorization. Thus, art that anticipates or renders obvious one group does not anticipate or render obvious another.

7. The inventions listed above are deemed patentably distinct and appropriate for restriction as shown, because they are of divergent subject matter, have acquired a separate status in the art, and have separately burdensome manual and/or computer-aided bibliographical searches.

8. A telephone call was made to Bill Kezer on April 24, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. All inquiries pertaining to this case should be directed to *Barba M. Koroma*. This examiner can normally be reached at: 703 305 1915, at *9:00am to 5:00pm, Monday through Friday*.

11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jyothsna Venkat, PhD, can be reached at: 703 308 2439. The phone number for the organization where this application or proceeding is assigned is: 703 308 2742. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is: 703 308 1235.
